(S) ST.-MARTIN-STRASSE / (U) GIESING / (BUS) UNGSTEINER STRASSE

For the first time in many years we in IT & Tech experience a serious downturn. From startups like Sono Motors, Personio or Franka Emika to large companies such as Bosch, Vodafone, and Microsoft the last months we saw some harsh news.

Reason enough to create a platform to discuss the situation. We are inviting IT professionals, engineers, students, and all working in and around the digital economy in order to get a 360° view on the City of Munich and the Future of IT and Tech in the Isar Valley.

We want to give you space and a chance to network. Additionally we invite industry experts to share their insights as well as to answer your questions.
